

# IS DESIGN INTUITIVE or CONSTRUCTIVE?

WorldUsabilityDay  
UXPA-DC

**HELLO!**

# I am Mohit Gupta

Certainly an Explorer,  
Definitely a Traveler,  
Probably a Reader, &  
Surely Adventurous...

 [theuxchap@gmail.com](mailto:theuxchap@gmail.com)

 [@memohitg](https://twitter.com/memohitg)

 [/in/mohitguptaux](https://www.linkedin.com/in/mohitguptaux)

# WHAT IS THIS

Take a quick guess and tell me what it is...

# THIS IS **LOVE**

Heart / Emotion / Emoticon / so on...

# THIS IS ~~LOVE~~ DESIGN

This is actually the power of design which influences you to think it as love / heart / emotion / ...

A large, bright yellow diagonal shape that starts from the top right and extends towards the bottom left, creating a split background of white and yellow.

1.

**WHY ELDERLY?**

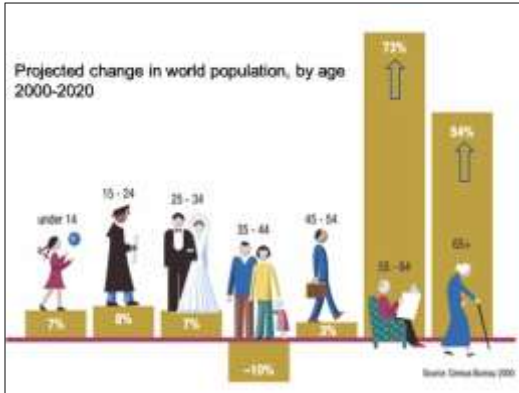

Case study :  
Designing for elderly

## “ ELDERLY – A POTENTIAL MARKET

- ▶ Elderly Population has **increased eleven fold** between 1900 and 1999 while nonelderly increased only threefold.
- ▶ The rate of growth of the elderly population has greatly exceeded the growth rate of the population of the world as a whole.
- ▶ The oldest old is the **fastest growing segment** of the elderly population.

# PROJECTED ELDERLY POPULATION CHARTS

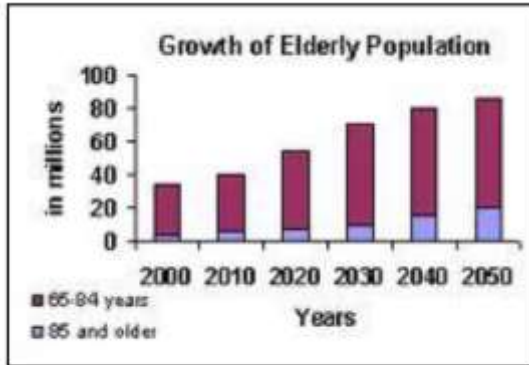

Today, the elderly market is the **largest market** there has ever been.

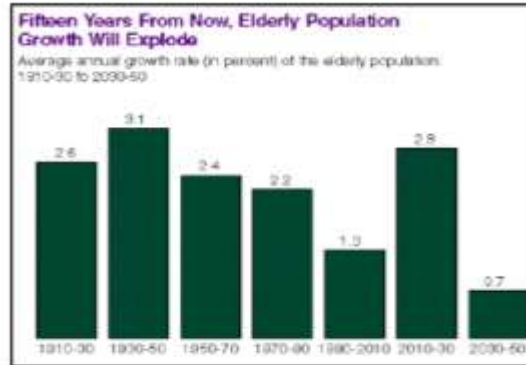

**International Comparison of Indicators of Population Aging**

Countries	Percent of elderly aged 65+		
	1990	2030	2050
China	5.6	15.7	22.6
India	4.3	9.7	15.1
Korea	5.0	18.1	24.7
Mexico	4.0	19.9	18.6
Canada	11.2	22.6	23.8
France	14.0	23.2	25.5
Germany	15.0	26.1	28.4
Italy	15.3	29.1	34.9
Japan	12.0	27.3	31.8
UK	15.7	23.1	24.9
USA	12.4	20.6	21.4

## ELDERLY MARKET- **COMMERCIAL SIGNIFICANCE**

**Early retirement** and the **growth of pensions** mean that a sizeable part of the new market is commercially significant and has the money to pay for design.

**More People grow elderly** now-a-days due to decreasing birth rates and Increasing life spans

# NEED FOR A **SPECIALIZED PRODUCT**

The product should enhance and not degrade their health.

# 2.

## UNDERSTANDING THE USERS

Supported by  
Medical Centres & NGOs

## WHO ARE **ELDERLY**

### MEDICAL CENTRES

- ▶ Max HealthCare
- ▶ AIIMS
- ▶ Standsford Biomedical Centre
- ▶ VM Medical College
- ▶ IITD Hospital

### NGOs

- ▶ HelpAge India
- ▶ Gharauna Society
- ▶ Sukhdham OldAge Homes

THE  
**CONVEXOCONCAVE**  
DESIGN APPROACH

SHADOWING  
/ BODY  
STORMING

ANALYSIS

EXISTING  
KNOWN  
ISSUES

## PROBLEMS VERSUS OPPORTUNITY AREAS

- ▶ Leisure / Social
- ▶ Bedroom Safety
- ▶ Daily Living
- ▶ Bathroom safety
- ▶ Mobility
- ▶ Fitness

## LEISURE/SOCIAL RELATED ISSUES

- ▶ Using remote control & other electronic home based appliances
- ▶ Problem in signing
- ▶ Use of mobile handsets, camera
- ▶ Making cash payments
- ▶ Problems at reservation counters, post offices, banks and other consumer service authorities
- ▶ Lack of communication with outside world

## **BEDROOM SAFETY RELATED ISSUES**

- ▶ Turn downs from both sides of bed
- ▶ Reach ability of things
- ▶ Removing / putting blankets
- ▶ Emergency help
- ▶ Spitting issue
- ▶ Dry mouth often occurs
- ▶ Change of bed sheet & user clothes
- ▶ Need for bedside bathroom
- ▶ Change of postures

## DAILY LIVING RELATED ISSUES

- ▶ Difficulty in turning door knobs / latches
- ▶ Difficulty in eating
- ▶ Identifying correct medicine & dosage
- ▶ Identifying switch buttons
- ▶ Self body lift from relaxed posture
- ▶ Problems in reading and writing

## MOBILITY RELATED ISSUES

### WHEEL CHAIR

- ▶ Customization with respect to living space
- ▶ Limits the productivity

### PERSONAL MOBILITY VEHICLES / WALKERS

- ▶ Usage technique
- ▶ Ergonomic and anthropometric requirements
- ▶ Designed as what body can do

### CANE STICK

- ▶ Leaning cane against wall or other surface
- ▶ Brings unwanted attention
- ▶ Difficulty to get back the cane once laid on ground
- ▶ Lifting body from relaxed posture

## BATHROOM SAFETY RELATED ISSUES

### WHEEL CHAIR

- ▶ Customization with respect to living space
- ▶ Limits the productivity

### PERSONAL MOBILITY VEHICLES / WALKERS

- ▶ Usage technique
- ▶ Ergonomic and anthropometric requirements
- ▶ Designed as what body can do

### CANE STICK

- ▶ Leaning cane against wall or other surface
- ▶ Brings unwanted attention
- ▶ Difficulty to get back the cane once laid on ground
- ▶ Lifting body from relaxed posture

## **FITNESS** RELATED ISSUES

### Physiotherapy Session

#### WITH CARETAKER

- ▶ Interest in exercise
- ▶ Required output
- ▶ Feel of importance

#### SELF EXERCISE

- ▶ Output less
- ▶ Forgetfulness
- ▶ Lack of interest

## BASIC GUIDELINES WHEN DESIGNING FOR THE ELDERLY

- ▶ Do not design 'special' products for elderly people.
- ▶ The conventional approach to design through style or materials is obsolete.
- ▶ **Physical independence** is the treasure. Design should encourage the body to work in a healthy way.
- ▶ Find the **balance** between under support and over support.
- ▶ Understanding **good body use** (what we should do) is far more important than data on what we can do.

# 3.

## IDENTIFYING THE REAL PROBLEM

Helps designers to have  
empathy, sensitivity and  
care while designing

BUT WHAT IS THE  
REAL **BIG** PROBLEM?

## A TYPICAL DAY IN THE LIFE OF ELDERLY

Pray

Yoga / Exercise

Eat Meals

Rest

Entertainment

Read

Chit-Chat

The image features a dark green background composed of several interlocking puzzle pieces. One large puzzle piece is missing from the center, creating a bright white, glowing void. The edges of the puzzle pieces are highlighted with a vibrant green glow. A diagonal white line runs from the top left towards the bottom right, partially overlapping the puzzle pieces.

**BUT WHAT IS THE  
MISSING PIECE?**

THEIR **SMILE**

A healthy **mind** leads to a healthy **body**.

# 4.

## DERIVING PROBLEM STATEMENT

Focus on the scope of work

Musculo-  
skeletal  
changes

Cardio  
muscular  
Changes

Gastro-  
intestinal  
changes

Sensory  
System

Endocrine  
changes

Neurological  
changes

Psychological changes

Anger , Isolation , Irritation , Depression

**ELDERLY HEALTH  
PROBLEMS**

## ACTIVITIES WHICH MADE **ELDERLY SMILE**

Playing Cards

Chess

Carom board

Ludo

Local Games

THINK ALOUD  
ACTION BASED  
WORD CLOUD

A word cloud on a yellow background. The words are arranged in a roughly rectangular shape. The largest words are 'Video', 'Interactive', 'Communication', 'Technology', 'Entertainment', and 'Productive'. Other prominent words include 'Joy', 'Animation', 'Calm', 'Game', 'Fun', 'Togetherness', 'Exercise', 'Responsive', 'Smile', 'Happy', 'Easy', 'Duplex', and 'Productive'. The words are in various orientations, some vertical and some horizontal.

Video  
Joy  
Animation  
Calm  
Game  
Fun  
Togetherness  
Interactive  
Communication  
Technology  
Exercise  
Responsive  
Smile  
Happy  
Easy  
Duplex  
Entertainment  
Productive

We need to **exercise**.

We love **fun**.

Often exercise is a **medical requirement**...

Can we make it fun ?? ...

## BRIEF

TO DESIGN A GAMING INTERFACE FOR ELDERLY  
TO PROVIDE FUNCTIONAL INDEPENDENCE

Gaming Console

Remote Control

Synchronizer  
& modulator

Equipment with  
sensors attached

# FEW COMMON HANDS EXERCISES

Wrist Stretch

Active range of motion

Wrist stretch

Tendon glides

Wrist flexion exercise

Wrist extension exercise

Grip strengthening

Wrist Rotation

## EXERCISING EQUIPEMENTS FOR HANDS

Our hands do so much for us. They are capable of a wide variety of functions: touching, grasping, feeling, holding, manipulating, caressing, and even when we talk. We caress the hair of a loved one (touch therapy).

The term "**hand-eye coordination**" describes the ability of the body's visual system to process information received through the eyes and use it to direct the movements of the hands.

# 5.

## ITERATIONS & REFINEMENT

Designing concepts and  
iterating based on the  
user feedback

## PROTOTYPING BLUEPRINTS - 01

Pressure points  
on hands

### Problems in existing gaming control:

- Difficulty to operate
- Learning required
- Easily retire
- Similar to the interface  
(look wise)

## PROTOTYPING BLUEPRINTS - 02

# PROTOTYPING BLUEPRINTS - 03

# INTEGRATED GAMING CONSOLES

A large, bright yellow diagonal graphic element that starts from the top right and extends towards the bottom left, separating the white background on the left from the yellow background on the right.

6.

## USABILITY TESTING & IMPACT

I hear, I forget;  
I see, I remember;  
I do, I understand...

# FINAL MOCKUP

# USABILITY TESTING

# CONCLUSION

- ▶ Bring back their **smiles** and happiness
- ▶ **Motivate** them from their minds to souls
- ▶ Improves **hand-eye co-ordination** ,thus providing brain exercise
- ▶ Enriches the social life & increase interactivity with surroundings
- ▶ Reduce **stress** and strain
- ▶ Helps in reducing **aging effect** & provides mind exercise, which in turn, reduces the possibility of memory loss
- ▶ The user is always in active state during the gaming as he/she is unconsciously doing **exercise** at the same time which solves the problems faced by user in physiotherapy session

## DOCTOR'S RECOMMENDATIONS

“ Has great potential & can help people suffering from chronicity of illness ”

- **Dr. Alaknanda Banerjee,**  
**Max Hospital**

“ Will surely increase the holding grasp & thus, show improvement in patients in all pinches – tip to tip, point to point & lateral pinch ”

- **Dr. Devendra Ramteke,**  
**AIIMS**

IS DESIGN INTUTIVE OR  
CONSTRUCTIVE ?

# IS DESIGN INTUITIVE OR CONSTRUCTIVE ?

ITS **“BOTH”** .

“ Design is all about **connecting the dots**  
& building **meaningful relationships** ”

**THANKS!**
